

Amendments to the Specification

Amendment to the specification is sought as outlined below. Applicant's numbering is that provided in the published patent application, US 2003/0167477 A1.

Please amend the specification at paragraphs [0057] and [0058] as follows:

[0057] FIG. 1 shows the structure of pCLYSM construct (Normal lysozyme C-terminal DNA and amino acid sequence, SEQ ID NO.: 8; C-terminal amino acid sequence alone SEQ ID NO.: 9; Linker arm, CNBr cleavage, Calcitonin and Amidation signal DNA and amino acid sequence, SEQ ID NO.: 10).

[0058] FIG. 2A-D show ~~shows~~ the DNA sequence of pCLYSM, excluding the bacterial plasmid (SEQ ID NO.4).

Please amend the specification at paragraph [0087] as follows:

[0087] The structure of pCLYSM is shown in FIG. 1, and the sequence in FIG. 2A-D.
pCLYSM consists of:
